

The first and only fire resistive material designed exclusively for the repair of existing fireproofing by YOU!... THE TRADESMEN

UNIVERSAL FIREPROOFING PATCH

ARCHITECTS · DESIGNERS · ELECTRICIANS
DRYWALLERS · BUILDING OWNERS
PROJECT MANAGERS · PLUMBERS

- ✓ **The Fast, Simple Way To Make Fireproofing Repairs**
- ✓ **Ready To Use Just Add Water**
- ✓ **Provides Up To A Two Hour Fire Rating**

They said it couldn't be done, but we did it! After thirty years in the fireproofing business, we came up with an idea that could solve the high cost of patching and compliance issues. We are proud to introduce....

UNIVERSAL FIREPROOFING PATCH

Key Benefits:

- UFP is fully vetted by VTEC, UL, and ITS laboratories.
- UFP has successfully met the requirements of ASTM E 84, ASTM E 119, and UL 263.
- All thermal tests have exceeded 2 hour duration.
- UFP has been tested compatible with both fiber and cementitious applications.
- At 432 sq in, the maximum patch size is 3 times the previous allowable standard.
- UFP is 1/2 the cost! - UFP can save about 50% or more over current repair costs.
- UFP is designed as a DIY product. You do not have to be a fireproofing contractor to apply UFP.
- Simple to Use - Just add water and mix.
- Each kit contains enough to cover 25 patches the size of a piece of paper (8.5" x 11") @ 1/2" thick.
- Available on-line or at local distributors; by the pallet or by the bucket.
- If you can identify the exact material originally applied, and are able to contact the original material manufacturer, and it is still available; by all means hire a certified applicator and follow their repair recommendation. If the original material is unknown, the original manufacturer is not around, and or the original material is not made then Universal Fireproofing Patch is your solution!!!
- UL Certified.
- ITS Verified.
